SUMMARY

Software Developer with professional experience building web applications and working with data-driven cloud systems. Experienced in developing backend functionality, APIs, authentication, database models, and frontend applications, alongside hands-on work with data collection, transformation, storage, automation, and analytics. Has worked with AWS-based workflows from data ingestion and processing through scheduled automation and reporting, as well as delivering 30+ personal websites and portfolios from frontend development through deployment.

EXPERIENCE

Data Engineer & Backend Developer Feb 2025 – Present
Tegeria

- Maintain and develop data workflows that collect and extract information from external APIs, websites, and other data sources.
- Work with data storage and processing using S3, DynamoDB, and SQL, including cleaning, transformation, and preparation of data for analysis.
- Build and maintain AWS Lambda functions for data processing, API endpoints, and scheduled jobs.
- Configure EventBridge schedules to automate workflows such as data updates and email processes.
- Work with Cognito for authentication and AWS services across cloud-based application workflows.
- Maintain and develop QuickSight reporting solutions, working with datasets, data sources, transformations, analyses, dashboards, calculated fields, filters, DAX, and scheduled refreshes.
- Monitor data and application workflows, troubleshoot production issues, and deploy and maintain cloud services.

Software Development (Independent) June 2026 – Present
Grid Creative Space

- Developed and deployed 30+ personal websites and portfolios using React, Next.js, TypeScript, and JavaScript.
- Built responsive frontend interfaces and reusable components based on individual project requirements.
- Integrated REST APIs and implemented application features including forms and authentication.
- Worked across frontend development, API integration, responsive design, SEO, testing, and deployment.
- Took frontend projects from implementation through production deployment and ongoing updates.

SELECTED PROJECT

Interio - Furniture Marketplace

Tegeria · Software Engineering Internship

4 months in 2024

- Built the complete backend and database model for a platform connecting users with furniture providers.
- Designed and implemented API endpoints, authentication, user management, CRUD operations, and core business logic.
- Designed the MongoDB database structure and implemented the application's data models.
- Built AWS Lambda functions to support backend functionality and application workflows.
- Implemented S3-based file and image storage for application content.
- Developed search and filtering functionality for working with marketplace data.
- Worked with JavaScript and TypeScript across backend development and AWS-based application services.

TECHNICAL SKILLS

Programming Languages: JavaScript · TypeScript · Java · SQL · Python (Basic)

Frontend: React · Next.js · HTML · CSS · Responsive Design · Forms · Authentication · SEO

Backend: Node.js · REST APIs · API Development · Authentication · CRUD · Backend Development

Databases: MongoDB · DynamoDB · SQL · Database Design & Modeling

AWS & Cloud: AWS · Lambda · S3 · Cognito · EventBridge · Amplify · QuickSight

Data & Analytics: Data Collection · Data Extraction · Data Cleaning · Data Transformation · Data Processing · Data Analysis · DAX · Data Visualization

Tools & Platforms: Git · GitHub · WordPress

EDUCATION

BSc in Computer Science (Oct 2021 – Jul 2024)

University of Tirana - Faculty of Natural Sciences

Focused on software development, algorithms, database management, and system architecture, with practical coursework across programming, databases, and software engineering.
